

## 1 Initial situation

- 1.1 Why this project and how did this idea develop?
- 1.2 How was the problem resolved in the past?
- 1.3 Why is there need for action?
- 1.4 Rough desired course of action?

## 2 Objective

- 2.1 What should be achieved in the end?
- 2.2 On what can the success be measured?
- 2.3 What has to happen so the solution can be realised?

## 3 Operational environment

- 3.1 Under which circumstances will the product be used?

## 4 Functional requirements

- 4.1 Which functions must exist?
  - 4.1.1 Needs to be separated into MUST, SHOULD, and COULD
- 4.2 Define the target group
  - 4.2.1 Personas
- 4.3 What is the product supposed to achieve and be able to do?

## 5 Non-functional requirements

- 5.1 Should the product be extendable?
- 5.2 Should alterations be possible?
- 5.3 What are the usability requirements?

## 6 Interfaces

- 6.1 Explanations (H-C, C-C...)

## 7 Quality requirements

- 7.1 Which quality characteristics should be fulfilled?
